Index of Subjects

Acid-set milk gels, calcium-chelating agents, effect of, 197

Bacteria, *see also individual bacteria and types*
psychrotrophic, adherence, dairy equipment surfaces, 381

Camel, milk, heat coagulation, 229
Carbohydrates, milk, heat treated, CO_2 acidified, 95
Caseins, α_s-, β-, κ-, purification, ion-exchange separation, 551
heterogeneity, milk, sheep, 39
purification, cation-exchange resin, 557
sorption behaviour, 307
α_{s2}-Casein, from goat's milk, 299
Cheddar cheese ripening, plasmin added, 209
Cheese, off flavour, styrene production, 533
oxo fatty acids, identification, 57
propionic acid bacteria, 65
Cheese ripening, accelerated, use of Lac$^-$ mutants of lactococci, 389
proteolysis, assessment, Cd-ninhydrin, 217
Cheese whey, heat treatment, hydrophobicity changes, β-lactoglobulin, α-lactalbumin levels, 527
Chhana, texture, microstructure, 413
Chymosin, *see* **Rennin**
Coagulation, milk proteins, heated, camel milk, 229
time-pH profile, lecithins influence, recombined milk, 177
ewes' milk, effect of recombinant chymosin, 81
Colostrum, cell growth, IgE antibody responses, 369

3-Deoxypentulose, in heated milk, 507
Domiati cheese, blood cholesterol, non raising, 89
Dried milk, hydroxymethylfurfural, measurement, 225

Enzymes, *see individual enzymes*
Esterase, activities, cell-free extracts, *Lactococcus lactis* subsp. *lactis*, 111

Goat(s), milk, α_s-casein, 299
udder, infection, somatic cell counts, 21
Gredos goats' milk cheese, ripening, microbiological-, chemical-changes, 563
Growth hormone, effect on milk yield, 243

Heat stability, *see* **Coagulation**, milk proteins, heated
Heat treatment, milk, acidified CO_2, carbohydrates, whey proteins, 95
bovine milk fat globule membrane, skim milk components, incorporation, 187
3-deoxypentulose, isolation, characterization, 507
Human milk, calcium, phosphate, citrate, lactation, initiation, 161
Hydroxymethylfurfural, measurement, powdered milk, 225

Insulin, metabolism, mammary gland, goat, 135

α-Lactalbumin, human, new form, 425
level, cheese whey, heat treatment, 527
D-Lactate dehydrogenase, from *Leuconostoc lactis*, intracellular pH, relationship, 359
Lactic acid bacteria, antimutagenic effect, milk, Trp-P2-induced mutagenicity to TA98 strain *Salmonella typhimurium*, 543
Lactobacillus delbrueckii subsp. ***bulgaricus***, SDS-solubilized whole-cell protein patterns, yogurts, 105
Lactococcus lactis subsp. ***lactis***, cell-free extracts, esterase activities, 111
β-Lactoglobulin, isolation, purification, 101
level, cheese whey, heat treatment, 527
Lecithins, heat coagulation time-pH profile, recombined milk, 177
Leuconostoc lactis, D-lactate dehydrogenase, intracellular pH, relationship, 359
Lipolysis, sheep's milk, deep-freeze storage, 49
Lysozyme, stability, mares' milk, effect of calcium, 331

α_2-Macroglobulin, from mastitis milk, 273
Mammary gland, epithelial cells, culture, characteristics, 491
goat, metabolism, insulin, effect of, 135
transepithelial potential difference, hand milking, administration, oxytocin, catecholamines, 469
K^+, Cl^- transport, apical membranes, 339
ultrasonography, α-, β-adrenergic agonist and oxytocin administration, 151
Manchego cheese, characteristics, effect of recombinant chymosin, 81
Mare, milk, lysozyme, stability, effect of calcium, 331
Mastitis, α_2-macroglobulin from milk, 273
cost-benefit analysis, 449
detection, capture immunoassay, 123
methionyl bovine somatotropin, effect of, 499
milk somatic cells, plasminogen activator activity, 461
sensor, 11
Milk, camel, protective proteins, antibacterial, antiviral activity, 169
coagulation, *see* **Coagulation**
somatic cells, plasminogen activator, activity, mastitis, effect of, 461
Milk composition, during suckling, sow, 287
human, calcium, phosphate, citrate, lactation, initiation, 161
milking throughout pregnancy, 233
saliva salts, diet, effect of, 1
sheep, casein heterogeneity, 39
fat, deep-freeze storage, effect of, 49
Milk ejection, aetiology, 479

Milk fat globule membrane, heat induced changes, 321
skim milk components incorporation, heating whole milk, 187
Milk proteins, *see also* **Whey proteins**
breakdown, *see* **Proteolysis**
peptides, gastric emptying, 437
thermal effects, nuclear magnetic resonance method, 517
Milk yield, frequent milking, growth hormone treatment, 243
methionyl bovine somatotropin, effect of, 499
frequent milking, goats, 115
saliva salts, diet, effect of, 1
Milking, frequency, milk yield, 243
recombinant bovine somatotropin treatment, 115
goat, administration of oxytocin, catecholamines, transepithelial potential difference, 469
throughout pregnancy, milk composition, 233
Milking equipment, psychrotrophic bacteria, adherence, 381
Milking machine, teatcup interactions, computer simulation, 253
teat tissue reactions, 265

Oligopeptides, Parmigiano-Reggiano cheese, 401
Oxo fatty acids, cheese, identification, 57

Parmigiano-Reggiano cheese, oligopeptides, 401
Pasteurized milk, keeping quality, assessment, 431
Penicillium caseicolum, styrene synthesis, 533
Peptides, gastric emptying, calf, 437
Propionic acid bacteria, cheese, 65

Proteolysis, assessment, Cd-ninhydrin reagent, cheese ripening, 217

Rasogolla, texture, microstructure, 413
Rennin, recombinant, ewes' milk coagulation, Manchego cheese characteristics, 81

Saliva salts, diet, effect on milk-yield, -composition, 1
Salmonella typhimurium, TA98 strain, antimutagenic effect milk on Trp-P2-induced mutagenicity, 543
Sheep, milk, casein heterogeneity, 39
Somatic cell counts, abnormal goat milk, detection, 21
Sow, milk composition, during suckling, 287
Storage, deep-freeze, fat stability, sheep's milk, 49
Streptococcus salivarius subsp. ***thermophilus***, bacteriophage resistance, 349
St 18, temperate bacteriophage, 71
SDS-solubilized whole-cell protein patterns, yogurts, 105

Teat, tissue reactions, machine-induced, 265

Udder, goat, infection, somatic cell counts, 21
Ultrafiltration, milk, membrane, cleaning agents, 29
Ultrasonography, mammary glands, α-, β-adrenergic agonist and oxytocin administration, 151

Whey proteins, cheese whey, heat treatment, 527
milk, heat treated, CO_2 acidified, 95

Yogurts, bacteria, protein patterns, 105
